

Charging and Storage

Your ClassVR headsets come in a rugged storage case, complete with wheels and an extendable handle for easy transportation around school.

This case is also used for charging. Place each headset into the foam with the power button facing upwards.

Plug a charging cable into the micro USB port on each headset, taking care that the connector is in the correct orientation.

Once you have connected all your headsets, check that the mains cable is securely seated and plug it in to a wall socket.

The case's interior fan will begin to operate and each headset's blue charging light will be illuminated.

When the headset is fully charged, the light will go out.
