

Sharing Your Playlists with the ClassVR Community

In the Plan section of the ClassVR Portal, you'll notice a Community section in the Libraries pane on the right. This is an area for teachers to share playlists of 360 images and videos with all ClassVR subscribers.

If you would like to share Playlists you have created to the Community Library, it's easy to do.

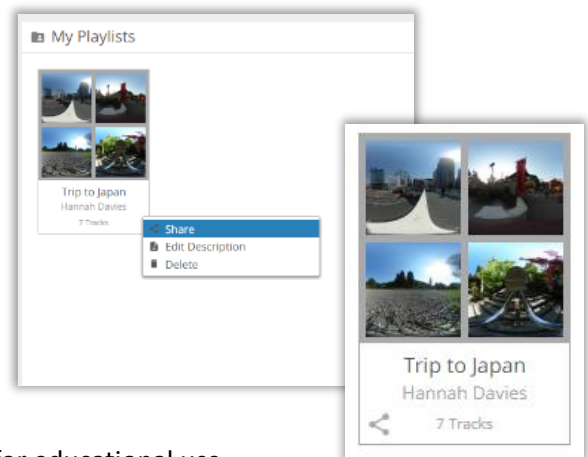

Once you have created and saved a Playlist, find it in the My Playlists Library. Right-click on the Playlist you wish to share.

Before you can share it, you'll need to add a description to help other teachers navigate the Community Library. Click Edit Description to do this. We recommend making this description as detailed as possible, and using hashtags to let other users know what subjects, topics and themes are covered.

Once you have saved your description, right-click on the Playlist again; you should see the Share action is now available. Just click to submit your Playlist to our team of Educational Specialists for review. Once the Share icon appears in the bottom-left of your Playlist thumbnail, it's been sent to the team.

Your Playlist won't appear in the Community Library straight away. We make sure that each submission is moderated by our staff to ensure its content is appropriate for educational use.

However, if you choose to share a Playlist with the ClassVR Community, bear in mind that it is your responsibility to seek permission to share the images and videos. This is particularly important if you submit content that includes images of students or their work.

To stop sharing your Playlist, just find it in the My Playlists Library, right-click, and select Stop Sharing.
