

Using Community Playlists

In the Plan section of the ClassVR Portal, you'll notice a Community section in the Libraries pane on the right.

Click this to view Playlists of 360 images and videos that have been created by teachers and shared with all ClassVR subscribers. Use the search box to find Community Playlists that are relevant to your topic.

Once you find a Playlist you'd like to use, simply drag and drop it into the Playlists pane.

From here, you can switch over to Deliver to step your students through these experiences, or click the paper plane button to send it to their headsets for independent exploration.

Although our team of Educational Specialists moderate every Playlist submitted to the Community Library before approval, we do recommend you review the content before sharing it with your students to ensure it is appropriate for the ages and abilities in your class.
