

## Creating a Playlist

A Playlist is a collection of 360 experiences that you can step your students through (or send to their ClassVR headsets for independent exploration). You can choose from our collections or build your own.

To get started with creating a Playlist, log in to [portal.classvr.com](https://portal.classvr.com) and make sure you are in the Plan section. Your Playlist is to the left of the screen.

The easiest way to get started is by searching the ClassVR Library for content. Type in your search term and click the magnifying glass, or press enter.

At the top, you'll see hand-picked Collections that are ready for you to use.

Under this are individual Tracks – 360 images or videos.

Just drag and drop the Collections or Tracks you'd like to add directly onto the Playlist.

Click and drag the Tracks to re-order them. To remove a Track, drag and drop it outside the Playlist pane. To clear the whole Playlist, click the bin/trashcan icon at the bottom.
