

## Finding Supporting Lesson Plans and Teaching Resources

ClassVR comes with teacher-written lesson plans, filled with cross-curricular ideas for all ages. You also have access to Augmented Reality worksheets that come to life when viewed through our ARC app on the ClassVR headsets.

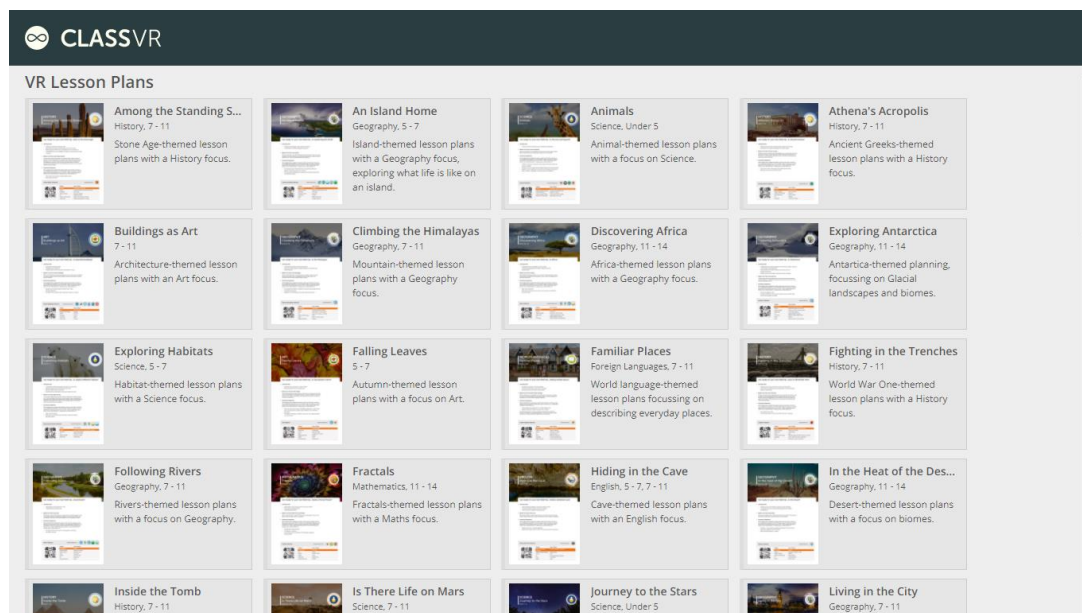

To find all these great resources, go to the Admin page by clicking the text at the top right of the ClassVR Portal.

Under Subscriptions, you can click to access Avantis Lesson Plans.

This will take you to the full collection of VR lesson plans and AR worksheets. From here, just click a thumbnail to view or download each PDF.

The AR worksheets work really well if you print them double-sided; students can look at the front page using AR to launch the augmented reality models, then complete the activity on the back page.
