CLASSVR®

## Enrolling Your ClassVR Headsets
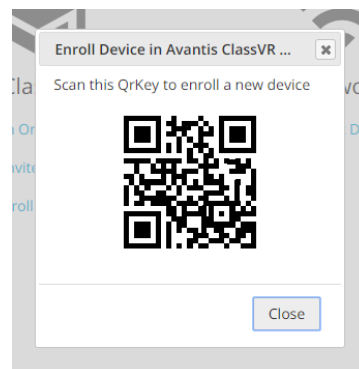

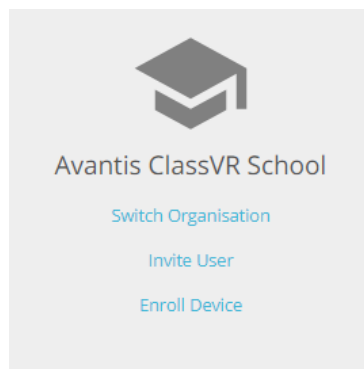

Your headsets may already be enrolled when you receive them.

You can check this by going to http://portal.classvr.com, clicking the Deliver tab at the top of the page, and looking at the Devices pane; the headsets should be listed here.

If you do not see all the devices you would expect, you may need to enroll them in your school's organisation.

You can find the enrolment QRKey in the Admin section of the ClassVR portal, under the name of your school.

On each of your ClassVR headsets, open the Scanner app by looking at the icon of a QR code and making the select gesture with your hand in front of the device.

Once the Scanner app launches, simply look at the enrolment QRKey until you hear a beep. The headsets should then appear in the Devices pane on the right.

Make sure your headsets are connected to a Wi-Fi network before you complete this step.
